

# Young DGK Science

05. – 06.12.2025  
Leopoldina Halle (Saale)

**Scientific Chair**  
Prof. Dr. Holger Winkels

**DGK Task Force Basic Science:**  
Prof. Dr. Brenda Gerull  
Dr. Florian Weinberger

**Young DGK Task Force Basic Science:**  
Dr. Hannah Billig, Dr. Laura Sommerfeld,  
Dr. Laura Parma, PD Dr. Susanne Karbach,  
Dr. Eric Schoger, Prof. Dr. Florian Kahles  
Prof. Dr. Claudia Götsch.

 Particularly suitable for young cardiologists

In cooperation with

**DZHK**  
Deutsches Zentrum für  
Herz-Kreislauf-Forschung

## Save the date

# Young DGK Science

**05. – 06.12.2025**  
**Leopoldina Halle (Saale)**

The Young DGK Basic Science Task Force is dedicated to strengthening the bond among the next generation of cardiovascular researchers. Our mission is to foster collaboration and innovation by bridging the gap between bench and bedside challenges. We believe that scientific progress emerges from open exchange and early interdisciplinary cooperation.

The Young DGK Science Meeting in Halle 2025 will bring together passionate young cardiovascular researchers for a two-day event set in the prestigious halls of the Leopoldina. We have invited leading experts in the field and invite our peers to share their insights in an engaging and interactive atmosphere.

This year's sessions cover topics including metabolomic and immunological aspects of cardiovascular diseases, the role of the multifaceted "exposome" and technological advancements shaping the way how research is done in the future.

Submit an abstract to be part of this event – we look forward to seeing you in Halle!

More information will follow soon.
